WORK EXPERIENCE

Gati Industries

Software Engineer GAM   Feb 21-present

-

EDUCATION

Shivaji University Kolhapur

Bachelor of Technology in Computer Science & Engineering - 8 GPA   March 27

PROJECT

Harkosh   May 25

- Developed Harkosh, an OpenSource Marathi Dictionary that utilizes Optical Character Recognition (OCR) to digitize and extract words and definitions from physical books, facilitating easy access to the Marathi language. The project features a fuzzy search capability, enabling users to find words even with uncertain spellings, thus enhancing usability for learners and native speakers alike. By focusing on Marathi-to-Marathi definitions, Harkosh promotes deeper linguistic understanding and supports the propagation of the Marathi language in the digital landscape.

SKILLS

Machine Learning ●●●●●   Deep Learning ●●●●●   Data Analysis ●●●●●
JavaScript ●●●●●   HTML & CSS ●●●●●   Python ●●●●●

- Polyglot: Marathi, English, Sanskrut, Hindi, German, Chinese & Japanese.
- Curation.
