WORK EXPERIENCE

DOOMSCROLLS.in

Software Engineer

MARCH 2025 - Present

- At Doomscrolls.in, I conceptualize, plan, and execute all aspects of the platform from system architecture and AI integration to frontend design and deployment, building an exploratory learning feed that personalizes knowledge discovery for every user.

EDUCATION

Shivaji University, Kolhapur

B.Tech Computer Science & Engineering - -

March 2027

- 2023–2025 Independent Projects: Conceptualized and developed Doomscrolls.in and related AI experiments while focusing on personal development.

PROJECT

MIHIRKOSH

May 2025

- Developed Mihirkosh, an open-source Marathi dictionary using OCR to digitize words and definitions from physical texts. Features fuzzy search for handling uncertain spellings and focuses on Marathi-to-Marathi definitions to enhance linguistic understanding and promote digital accessibility of the language.

Core Technical Skills

- Technical Skills: AI integration • Python • Full-stack development • Backend architecture • Automation systems • Data handling • Optical Character Recognition (OCR) • Manufacturing process knowledge (induction hardening, cold core casting)
- Design & Creative: Product design • UI/UX aesthetics • Visual storytelling • Narrative design • Linguistic and cultural sensitivity • Minimalist interface design
- Strategic & Interdisciplinary: System design thinking • Research and self-learning systems • Product vision and execution • Entrepreneurship • Cross-domain synthesis (AI × manufacturing × education)
- Proficient in: Java, MERN stack, Python, debugging complex systems
- Familiar with: Ruby on Rails, data preprocessing & dimensionality reduction
